

space&interiors 2018: the future of living on display during Milan Design Week

Stefano Boeri Architetti transport Architecture and Interior Design to Mars with the exhibition/event titled THE FUTURE OF LIVING AND THE PLANET OF THE FUTURE - Mars, materials, solutions, innovations

PRESS

Milan Design Week is most definitely the leading global event for those involved in architecture and design with more than 400,000 visitors to the Lombardy capital from all over the world. Among the important events scheduled for 2018, one very special international exhibition stands out since it presents a vision of the future of living and whose curatorship has been entrusted to one of the top names on the international architecture scene, the designer of the **Vertical Forest in Milan** and many other important projects created around the world.

None other than **Stefano Boeri Architetti** will be responsible for the 2018 edition of the **space&interiors** exhibition/event at the Fuorisalone simultaneously with the **Salone del Mobile.Milano**. Thanks to a highly suggestive set design, **Stefano Boeri Architetti** will be taking a selection of products from some of the best known companies in the architecture and interior design sector to the Red Planet, inspired by a project for the “green” colonization of Mars first developed for the city of Shanghai.

THE FUTURE OF LIVING AND THE PLANET OF THE FUTURE will be an opportunity to explore the future of materials, products and new ways of living in our homes and cities.

The future of interior design will be presented along with the best in **materials, solutions** and **innovations** in a fluid setting made immersive thanks to video installations by the architect video-makers **Davide Rapp** and **Giorgio Zangrandi**.

There is a rich schedule of cultural and informal opportunities and meetings organized together with Stefano Boeri Architetti featuring the participation of leading figures from the worlds of architecture and scientific and space innovation, offering the visitor an extraordinary mix of sensations, information and new ideas and developments.

space&interiors, which will be held at The Mall/Porta Nuova, will be one of the Innovation Design District’s leading events; for a few days Mars will really be **the closest of the far distant planets**.

space&interiors is organized by **MADE eventi**, a part of the **Federlegno Arredo Eventi Spa** which was established to preside the organization of **Salone del Mobile.Milano**.

Stefano Boeri Architetti is the studio founded by **Stefano Boeri** (the Boeri Studio until 2008) with offices in Milan, Shanghai and Tirana and dedicated since 1993 to the research and practice of architecture and urban planning. Among the best known projects are the Vertical Forest in Milan (International Highrise Award 2014 and Best Tall Building Worldwide 2015), the Villa Méditerranée in Marseille, the 2030 Tirana General Local Plan, reconstruction projects after the earthquakes in Amatrice and Norcia and the family of Vertical Forests that will be planted in Nanjing, Lausanne, Utrecht, Eindhoven and Paris.
